

Label for New Product Based on Default Information

Environmental Information for the Electricity Product Exelon Energy

(This is a new energy product. Exelon Energy has made no guarantee as to the environmental characteristics of the energy to be supplied from August, 1999 through January, 2001. The data shown below are default values, and do not necessarily reflect the energy that Exelon Energy will supply.)

Electricity can be generated in a number of ways with different impacts on the environment. The standardized environmental information shown below allows you to compare this electricity product with electricity products offered by other electric suppliers.

Energy Source

Default values are shown which represent 1996 regional averages.

| | |
|-----------------------------------|------|
| Coal | 49% |
| Gas | 7% |
| Hydroelectric (large) | 2% |
| Nuclear | 34% |
| Oil | 6% |
| Renewable energy | |
| Captured methane gas | 0% |
| Fuel cells | 0% |
| Geothermal | 0% |
| Hydroelectric (small) | 0% |
| Solar | 0% |
| Solid waste | 2% |
| Wind | 0% |
| Wood or other biomass | 0% |
| Renewable energy sources subtotal | 2% |
| TOTAL | 100% |

Air Emissions

The emission data given are default values and represent the average amount of air pollution associated with the generation of electricity in the region. This amount is compared to the New Jersey benchmark. The benchmark approximates the average emission rate for all electricity generation in New Jersey.

CO₂ is a “greenhouse gas” which may contribute to global climate change. SO₂ and NO₂ react to form acids found in acid rain. NO₂ also reacts to form ground level ozone, an unhealthful component of “smog.”

| Pollutant | Emission Level |
|-----------------|----------------|
| CO ₂ | 126% |
| NO ₂ | 153% |
| SO ₂ | 396% |

Energy Conservation

Exelon Energy is not investing in energy conservation measures for this electricity product. Energy conservation measures mean less electricity needs to be generated and pollution is avoided.

| Avoided generation | Avoided Air Emissions |
|--------------------|------------------------|
| 0 KWh | 0 tons CO ₂ |
| | 0 tons NO ₂ |
| | 0 tons SO ₂ |
